

PRESS RELEASE

Bridgeborn Expanding into New International Markets

Bridgeborn's new subsidiary principles and founders add 60 years of real-time simulation and training experience to corporate family.

Virginia Beach, VA – April 28, 2008 - TriLink Systems will focus on the International Commercial market place with specific near term targets in the integration of Bridgeborn's unique visualization technical capability in the International Power Generation and Water industries and related industries around the world. The creation of TriLink is a strategic move to expand the commercial business and capitalize on recent successes with continued interest in Bridgeborn solutions in the international marketplace.

Robert Kershner, CEO, and Hal Paris, President, of TriLink have worked with Bridgeborn for many years while Executives at GSE Systems, world leader in power plant simulation. In these contractual relationships they have demonstrated their ability to market the technology to international clients and institutions of higher education.

"We are very excited about the opportunities that Bob and Hal bring to the corporation. Their many previous successes in the international marketplace is certainly a valuable addition. Coupled with previous experience in the adoption of the Bridgeborn technology, Bob and Hal are already marketing the capability abroad and we expect significant rewards to both companies", said Tim Ambrosino, Chairman Bridgeborn.
